

1. Runa, a 4-year-old child, is learning to write words starting with “a”. However, as a beginning, she often misspells words. Your task is to help Runa in writing the correct word whenever she misspells something. For example, if she writes “abacas”, print “abacus”.

For simplicity, you may assume that Runa only knows the following words:

- abaculi
- abacus
- abacuses
- abide
- abduct
- abbreviation
